

Eclipse 4250 IE

Liquor control system

ECLIPSE 4250 IE liquor control system with network adapter

You can connect the Eclipse 4250 IE liquor system directly to your computer network saving on expensive cable installation. The system is equipped with a RS-232 and a RS-422 port as well for serial interfacing. The Liquor manager software is provided to configure the brands, pour sizes, item prices and POS menu items if the system is to be interfaced with a POS system or a cash register. The software can be installed on any Windows based PC on your computer network to access all your systems directly or by remote using the Internet.

SPECIFICATIONS

- Up to 256 alcohols or wines
- Unlimited number of pourers per brand
- 200 watts to open pourers
- Built-in pourer un-blocking system
- Four programmable pour sizes per brand
- Heat sink prevents activator ring from overheating in heavy use
- Option to return to a pre-set pour size automatically
- Automatic pour restart option with programmable delay
- **Power:** 12 Volts DC 2A
- **Communication:**
 - Ethernet adapter card up 115Kbytes per sec
 - RS-232 port (d-sub9F null modem) up 115Kbytes per sec
 - RS-422 port up 115Kbytes per sec
- **Material :** Anodized Aluminum (RoHs)
- **Dimensions:** 8.9 W X 4.3 D X 2.3 H (226 W X 109 D X 58H)
- **Weight:** 2.9 lbs (1.27 Kg)

Eclipse 4250 IE

Liquor control system

Pouring speed specifications

- Pouring speed at 10 ml per second for alcohol
- Pouring speed at 25 ml per second for wine.
- Time to serve a measured one shot drink (30 ml): 9 sec
- Time to serve a measured two component cocktail: 20 sec
- Maximum number of drinks per hour (estimate): 150

Operation

1. Stand alone

Each brand and size in the system can be set with a price using the software to configure the system. The Eclipse 4250 will print an end of shift report to a serial or TCP/IP bar printer. Counters can be cleared at the end of the day with a manager key.

2. Serial interface to registers or POS systems

The Eclipse 4250 has Berg's (generic and basic) and Micros protocols (ILDS and NALDS) embedded. The liquor system can interface to most POS systems that have a liquor system interface. Several video demonstrations are available on the Auper controls youtube channel.

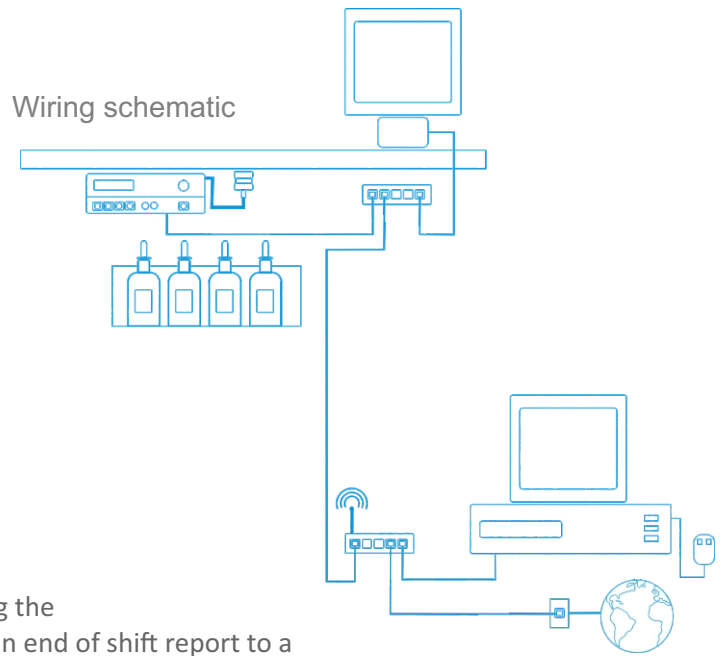

3. Liquor Manager Live interface

The Liquor Manager Live software will interface your Eclipse 4250 with practically any POS system on the market. No additional cables are required. Everything is achieved by network. Several systems can be used with each POS terminal. Every drink poured and rung in the POS are recorded and time stamped.

The system keeps track of POS entry errors and forgotten sales balancing the end of shift report automatically. The end of shift can print to a bar printer listing the amount owed per dispense station.

A pre-checking option can be activated to force bartenders to ring in the drinks in the POS before they can be served.
