BLACK HAUS	6.5	4.31	2.88	1.43

BAR: \_\_\_\_\_ DATE: \_\_\_\_\_

Contact: \_\_\_\_\_ Tel: \_\_\_\_\_

email: \_\_\_\_\_

This customer established a regular shot size of 1 1/8 Oz. To calculate the smaller shot sizes that can be used in some mixed drinks we calculate the price per ounce and multiply by the fraction corresponding to the shot size.

Setting a shot size to zero will disable it. Enter "N/A" instead of the price in the corresponding cell for the brands you want to disable and we will set it to zero.

In this example we divide  $\$8.50 / 1.13 \text{ Oz} = \$ 7.52 \text{ per Oz.}$  X  $0.75 = \$5.64$

If the liquor system is interfaced to your POS system using Liquor Manager Live, the prices will serve to calculate how much is owed in the event of a discrepancy between the POS and the liquor system.

If you are using the liquor system with a printer, the price per shot will be used to calculate what the bartenders owe you. The price of mixed drinks on your menu should match the price of the combination of pour sizes to make it.

A bottle of wine contains 25 Oz. Wine by the glass sizes should be set to 5, 6 or 8 Oz. to avoid leaving partial glasses in the bottles. Blue pourers are required to serve wine by the glass.

Wine by the glass size: \_\_\_\_\_
